ABOUT

Software Engineering professional with experience in **Quality Assurance (QA)**, **test automation**, and **continuous integration** in web and mobile projects. Focused on improving development processes, standardizing testing, and providing **technical mentorship** for quality teams.

Possesses a solid foundation in **Agile methodologies**, requirements analysis, automated testing (Cypress, Selenium, Robot Framework), and CI/CD pipeline integration (Jenkins, Docker, Azure DevOps).

Develops and maintains automation for applications in **React**, **Laravel (PHP)**, and **Flutter**, with an emphasis on testing best practices (Shift Left, Page Object Pattern, SOLID, and Clean Code). Also works with test documentation, BDD scenario creation, and monitoring of staging and production environments.

In addition to technical activities, it offers **mentorship and consulting** for companies, focused on implementing quality processes, team training, and standardizing ticket creation and performance metrics (time to open, resolution, and reopening).

ACADEMIC

Bachelor's Degree in Software Engineering (Híbrida) – Unisinos (*Present* -)

Undergraduate Thesis: *"Use of Cloud Services for Web Projects – Applying Standardization in Small Projects"*

Focus on cost and performance analysis of hosting and server environments for startups and small to medium-sized projects.

Tecnólogo em Análise e Desenvolvimento de Sistemas – UNINTER, 2020

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, PHP, Java, Flutter/Dart

Automation Tools: Cypress, Robot Framework, Selenium, Testing Library

Environments & Tools: Docker, Jenkins, Azure DevOps, Git, Google Cloud Platform

Methodologies: Agile/Scrum, BDD, TDD, Page Object Pattern, Shift Left Testing

Operating Systems: Linux (Arch/Omarchy), Windows

PROFESSIONAL EXPERIENCE

Ladybug – Independent Consultant – QA Engineer (2023 – *Present | Remote*)

- Providing consultancy and technical mentorship in **software quality** and **test**

automation.

- Implementation of QA standards, automation frameworks, and continuous testing processes.
- Support in defining **testing strategy, CI/CD pipelines**, and documentation best practices.

  Main Skills: QA Process Management, GitFlow, Mentorship and Coaching, Agile Testing.

PROJECTS

Standardization of QA Processes and Ticket Opening – Implementation of a structured ticket flow for faster response and resolution times.

Automation of Web and Mobile Tests – Use of Cypress, Robot Framework, and Selenium integrated into Jenkins pipelines.

Technical Mentoring in QA and Test Automation – Guidance for junior professionals on automation structure and best practices.

Analista de Testes Automação – Analista de Testes / QA

- Automação de testes frontend com Cypress e suporte a testes manuais.
- Participação ativa nos refinamentos e definição de critérios de aceitação.
- Colaboração com times ágeis em práticas de entrega contínua.

COMPLEMENTARY ACTIVITIES

- Active member of QA and software testing communities.
- Contributor to LinkedIn with educational posts on QA, automation, and mentorship.
- Focused on quality improvement and standardization in small and medium-sized software projects.

English: Technical (Reading and Writing)
